Dear Prof.Pankaj

Greetings from Chennai Institute of Technology.

Further to our discussion, let me brief you about this student exchange initiative.

We at Chennai Institute of Technology has initiated a Students and Faculty Exchange Program to share the expertise, knowledge, resources, culture etc and engage in all possible collaborative activities of mutual interest like Skill development, Research & Innovation, which can benefit the student and faculty community and also promote collaboration between the institutions.

We are reaching out to selected reputed institution extending our interest and support to this academic collaboration. Through this arrangement, the faculty and students will gain hands-on experience to some of the trending and future technologies gaining confidence to handle the real time problems.

We look forward to exchanging 10 to 15 students between the institutes for a period of 10 days to two weeks duration and they can be trained in a particular domain based on the needs and resources availability.

We can enter into an understanding offering all possible support to each other, like what we offer are, no charges for the Training, food and accommodation will be provided at free of cost. The visiting institution has to take care only the conveyance charges and any incidental expenses during their site seeing etc.

I am herewith attaching the details of our internship module. As you have mentioned your students' examination is getting over by end of April, we are happy to host you from the last week of April onwards. So kindly look into this proposal and let us know your convenience.

TECHNO INDIA NJR INSTITUTE OF TECHNOLOGY
Udaipur

Kindly suggest what is the domain training you can offer to our students, accordingly we shall share our students' details also. Our students' exam is getting over by mid of May depending on department and year, So we will be able to send our student only by mid of May.

Looking forward to your response.

Thanks and Regards

Dennise Mathew
