Hi Aaditya,

Thank you for the signed NDA. Please find attached countersigned copy here.

I am sharing the SDK, documentation, and product specifications to get the hang of the 3DoF JioGlass and its capabilities.

SDK link: https://1drv.ms/u/s!AjW7dWgzUxE6ghh6l4cCgyyXvZdw?e=pdjaGN

Here's what I need to move forward by next week:

1. Application concept in brief

2. What would be the features you would like to bring on JioGlass/ how will users interact with the application?

3. What would be your timelines for 3D modelling, prototyping, development, testing and publishing on the platform?

4. A tentative date by when you will be able to publish on JioGlass

5. Approximate engagement time for the app

6. UI/UX samples (if you have them ready)

Discord server for technical support: https://discord.gg/4CRCf2At
Please note that this is a private community for developers who are actively building for JioGlass. This link will expire in 24 hours.

Please also let me know if we can have a joint webinar next month with your partner schools and labs where we can help students understand the capabilities of JioGlass and how they can grow with our platform.

Looking forward to working with you!

Cheers,
Ishika

Good Afternoon Ishika,

My team memebers are waiting for the call. Let's start

Hi Aaditya,

Hope you're doing well!

When can I expect an update on the applications concepts that you would like to build for JioGlass? I want to proceed to the next step and formalize our partnership with the developer evaluation agreement.

Thanks,

Ishika
