OUR PROGRAMMES

An Intense, Fun and Super-effective 2-3 day Workshop For Boys and Girls

Students find a major shift in their energy levels, thought-processes, confidence and self expression. After going past what stops them, usually, students are delighted to discover and invent new ways of being, ways they had completely shunned as impossible. They get clarity on what they want to create and achieve new goals which are free of past patterns of the “underestimating” or “aiming too low” attitude. They experience a new excitement for goals and feel assured in their ability to accomplish them.

Before "Find the Super-hero in You Workshop", I was very shy and afraid to talk on stage, I was unable to communicate with unknown people. After this class I am open minded. Now, I've decided to communicate freely with people and know their views and feelings.

An fun, liberating and powerful 2 day workshop only for girls

This is a powerful program designed only for girls in their late teens, around adolescence. This is a stage of the girls life full of changes, a time of rapid physical development and deep emotional changes. These are exciting, but can also be confusing and uncomfortable for girls. They make close relationships outside the family, with friends of their own age as their life outside the family develops. Adolescence is the time when girls start in earnest to learn about the world and to find their place in it. This 2 day, youth centred program, aims at creating a safe and open space for the girls to interact, by removing the inhibitions that may be caused otherwise. We know that girls don't grow in programs, they grow in communities, and that is why we successfully use the 2 day workshop as a medium to give breakthrough results to young women, and create a conducive community out of their class. A cultural shift is observed at most colleges where this program is conducted. This provides opportunities for young girls to experience success when trying something new, and not be failure-fearing.

We couldn't ask for better results out of this workshop. The culture of the college has changed. The confidence level, interaction of students with faculty and the energy levels have increased. At Techno, we aim at creating job-ready professionals and life-ready individuals that contribute to society.

These workshops have been the perfect start to build that foundation.!
