Course File Data Analytics (4ME2-01)

Dr. Kalpana F. Department of Basic Science

RAJASTHAN TECHNICAL UNIVERSITY, KOTA Syllabus 2nd Year - IV Semester: B.Tech. : Mechanical Engineering

4ME2-01: DATA ANALYTICS

	iit: 2 Max. Marks: 100 (IA:20, F	
	OT+OP End Term Exam: 3	
SN	Contents	Hours
1	Introduction: Objective, scope and outcome of the course.	1
2	Introduction to Multivariate Statistics-Degree of Relationship among Variables-Review of Univariate and Bivariate Statistics-Screening Data Prior to Analysis-Missing Data, Outliers, Normality, Linearity, and Homoscedasticity.	4
3	Multiple Regression- Linear and Nonlinear techniques- Backward Forward-Stepwise- Hierarchical regression-Testing interactions (2way interaction) - Analysis of Variance and Covariance (ANOVA & ANCOVA) - Multivariate Analysis of Variance and Covariance (MANOVA & MANCOVA).	6
4	Logistic regression: Regression with binary dependent variable - Simple Discriminant Analysis- Multiple Discriminant analysis Assessing classification accuracy- Conjoint analysis (Full profile method).	5
5	Principal Component Analysis -Factor Analysis- Orthogonal and Oblique Rotation-Factor Score Estimation-Multidimensional Scaling- Perceptual Map-Cluster Analysis (Hierarchical Vs Nonhierarchical Clustering).	5
6	Latent Variable Models an Introduction to Factor, Path, and Structural Equation Analysis- Time series data analysis (ARIMA model) – Decision tree analysis (CHAID, CART) - Introduction to Big Data Management.	5
	TOTAL	26

Course Overview: The course has certain outcomes by virtue of which the students will get an idea of the subject Data Analytic.

Course Outcomes:

CO No	Cognitive Level	Course Outcome
1		Describe Data Analytics and the skill sets need for a data analyst.
2	Comprehension	Explain statistical inference and probability distribution commonly used as foundation for statistical modelling.
3	Synthesis	Apply basic data analytics techniques: ANOVA, MANOVA, ANCOVA, MANCOVA, liner regression.
4	Synthesis	Identify common approaches and algorithms for basic features selection, decision trees and factor analysis.
5	Synthesis	Apply common approaches and algorithms used for Cluster analysis and Time series model.

Prerequisites:

- 1. Fundamentals of Database Management System.
- 2. Students should know about MS Excel.
- 3. Students should be able to implement the Data Analytics algorithm with Excel.
- 4. Students should be able to work various Spreadsheets tools.

Course Outcome Mapping with Program Outcome:

Course Outcome	Program Outcome											
CO No.		Domain-Specific Domain-Independent										
	PO PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO9 PO1 PO11								PO11	PO12		
CO 1	2	0	0	0	0	0	0	0	0	0	0	0
CO 2	2	2	0	0	0	0	0	0	0	0	0	0
CO 3	2	2	0	3	0	0	0	0	0	0	0	0
CO 4	2	3	0	3	0	0	0	0	0	0	0	0
CO 5	0	3	0	2	0	0	0	0	0	0	0	0
1: Slight (Low),	1: Slight (Low), 2: Moderate (Medium), 3: Substantial (high)											

Lecture plan based on Unit 1(Introduction - Outcome)

Lecture No.	Торіс	Unit Mapping
1	Objective and Concept of Data Analytics, and how are they different from traditional Database Management systems with Real-time application use of Data Analytics	1

Lecture plan based on Unit 2 (Introduction to Data Analytics)

Lecture No.	Торіс	Unit Mapping
2	Introduction to Multivariate Statistics Degree of Relationship	2
3	Introduction to Outliers and Normality	2
4	Linearity and Homoscedasticity	2
5	Variable Review of Univariate and Bivariate Statistics Screening Data	2

Lecture plan based on Unit 3 (Multiple Regression)

Lecture No.	Торіс	Unit Mapping
6	Understanding Linear and Nonlinear Techniques	3
7	Basic about Backward Forward Stepwise Hierarchical Regression	3
8	Testing Interactions (2 way interaction)	3
9	Analysis of Variance and Covariance (ANOVA & ANCOVA)	3
10	Multivariate Analysis of Variance	3
11	Multivariate Analysis of Covariance (MANOVA & MANCOVA)	3

Lecture plan based on Unit 4 (Logistic Regression)

Lecture No.	Торіс	Unit Mapping
12	Regression with binary dependent variable	4
13	Simple Discriminant Analysis	4
14	Multiple Discriminant Analysis	4
15	Assessing Classification Accuracy	4
16	Conjoint Analysis (Full Profile Method)	4

Lecture plan based on Unit 5 (Principal Component Analysis)

Lecture No.	Торіс	Unit Mapping
17	Component Analysis	5
18	Factor Analysis	5
19	Orthogonal and Oblique Rotation Factor Score Method	5
20	Multidimensional Scaling Perceptual Map	5
21	Cluster Analysis (Hierarchical VS Non-hierarchical Clustering)	5

Lecture plan based on Unit 6 (Latent Variable Models)

Lecture No.	Торіс	Unit Mapping
22	Introduction to Factor, Path and Structural Equation Analysis	6
23	Time Series data Analysis (ARIMA Model)	6
24	Decision Tree Analysis (CHAID, CART)	6
25	Introduction to Big Data Management	6
26	Case Studies of Big Data Management	6

Textbook - Dr Anil K Maheshwari, "Data Analytics Made Accessible:2020 Edition"

Reference Sessions – <u>https://youtu.be/igmWbLprb_A</u>

MOOC (Coursera) -https://www.coursera.org/articles/what-is-data-analysis-with-examples

Course Level Problems (Test Items):

CO No	Problem Description								
1	A. Why is Big Data hot now? Discuss one case study in brief.								
	B. Explain the Data Analytics.								
2	A. Write a brief essay on "Factor Analysis".								
	B. Write a short note on cluster analysis.								
3	A. What is ANOVA?								
	B. Explain briefly MANOVA and MANCOVA.								
4	A. What is residual in multivariate analysis?								
	B. How would you differentiate among multiple discriminant analysis,								
	regression analysis and logistic regression analysis?								
5	A. What do you understand by ARIMA model in time series data analysis?								

Assessment Methodology:

- 1. Online quiz/poll question after every unit.
- 2. Practical exam in the lab where they have to implement their skills to manage the data for the given problem statement.
- 3. Midterm subjective paper where they have to write algorithms to perform different operations.
- 4. Final paper (subjective paper) at the end of the semester.

÷.

http://www.rtuonline.com

- Q.2 Differentiate between CHAID and CART. How CHAID is better than CART? [10+5=15]
- Q.3 The following table gives the average monthly sale of 4 salesman in three different types of territories: [15]

Territory	Salesman				Total
	A	В	С	D	Total
x	5	4	4	7	20
Y	7	8	5	4	24
Z	9	6	6	7	28
Total	21	18	15	18	72

Carry out a two way analysis of variance table from the above facts and interpret the result.

The 5% value of F for (3, 6) and (2, 6) degree of freedom are 4.76 and 5.14 respectively.
