

SUMMARY OF STUDENT SATISFACTION SURVEY & ACTION TAKEN

On account of the ongoing pandemic and lockdown, an online student satisfaction survey was carried by assigning the task to a senior faculty not directly involved in teaching any RTU course. The parameters were broadly split into three categories for better focus in corrective action. These areas are:

1. Teaching learning process by Faculty
 - a. Syllabus Coverage
 - b. Faculty Preparation for Class
 - c. Teaching Approach
 - d. Fairness of Internal Evaluation
 - e. Assignment Feedback
 - f. Faculty Illustrating Concepts
 - g. Faculty use of ICT tools
2. Mentoring process and Communication with students
 - a. Faculty Communication
 - b. Teaching and Mentoring Process
 - c. Mentor Follow up
 - d. Faculty Identify Strengths
 - e. Faculty Identify Weaknesses
 - f. Institute efforts to Engage Students
3. Opportunities to Grow & develop new Competencies
 - a. Institute Support for Internship
 - b. Opportunities to Learn & Grow
 - c. Faculty inform about expected competencies
 - d. Institute use of Student Centric Methods
 - e. Faculty encouragement to participate in extra- curricular activities
 - f. Institute efforts for Soft skills

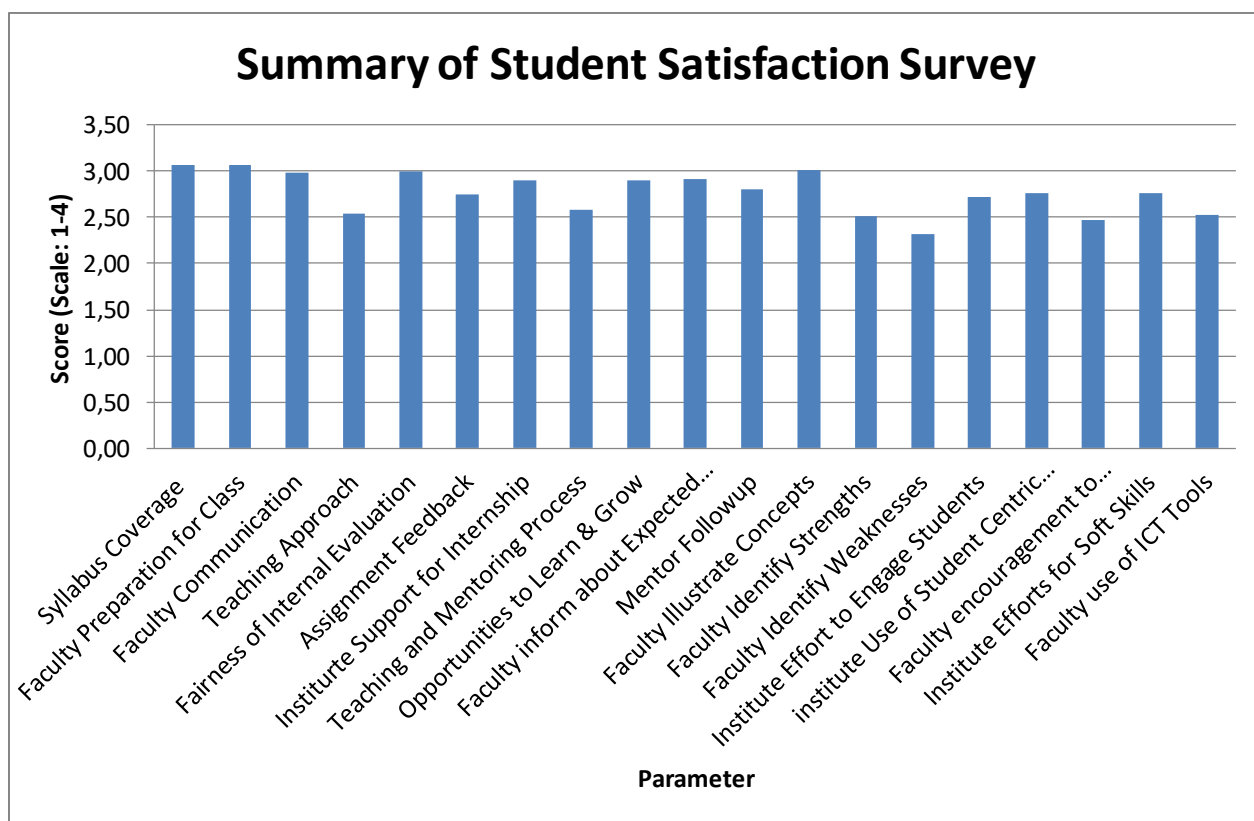

पंजाब विश्वविद्यालय
Techno Park, NDA, 100 ft. Road, Sector 17
Punjab, Chandigarh - 160017 (India)
Kaladwas, Udaipur-313003 (Rajasthan)

The overall summary of the survey is given below. The following observations were made about feedback received and action taken:

1. Covoid-19 and the resulting lockdown presented unique challenges for the teachers on account of students not coming to college or being able to participate in laboratory exercises. It was decided that the top priority was to ensure that syllabus coverage did not suffer very heavily;
2. Despite the challenges due to Covid-19, course coverage was good except in mathematics on account of the difficulty in face to face interaction and ease of checking student work/problems in the class. It was decided to assign additional classes for mathematics & other courses that focused on solving quantitative problems;
3. Student satisfaction was found to lag in all areas where personalized interaction was required. Thus mentoring process, mentor follow-up and identifying strengths and weaknesses of students were seen to lag. It was decided to set up studio facility at the institute to help

students and faculty improve their interaction. Also, it was decided that as soon as the easing of restrictions is announced, students would be permitted to come to the institute in small groups for face-to-face interaction with faculty. Once all things return to normal, mentoring would be given additional impetus and closer interaction between students and mentors/faculty emphasized.

4. A well-equipped modern gym would be set up and students encouraged to go for regular exercises.
5. Students and faculty to continue learning through online courses and work on research papers.

6. The descriptive remarks made were reviewed & the following were identified for immediate action: (i) Additional facility beyond online classes since online classes are seen to be less effective than regular face-to-face classes; (ii)
 - a. To improve online courses, studio facility and additional equipment have been purchased, LMS instituted and course coverage in all courses would continue to be monitored;
 - b. HODs to speak to faculty to increase interaction with students and focus;
 - c. Positive aspects of trainings/projects to be regularly emphasized & highlighted.
7. The following would be taken up after Covid-19 subsides and full time classes are regularized:
 - a. Increased interaction between mentors/faculty and students;
 - b. Greater focus on extra-curricular activities;

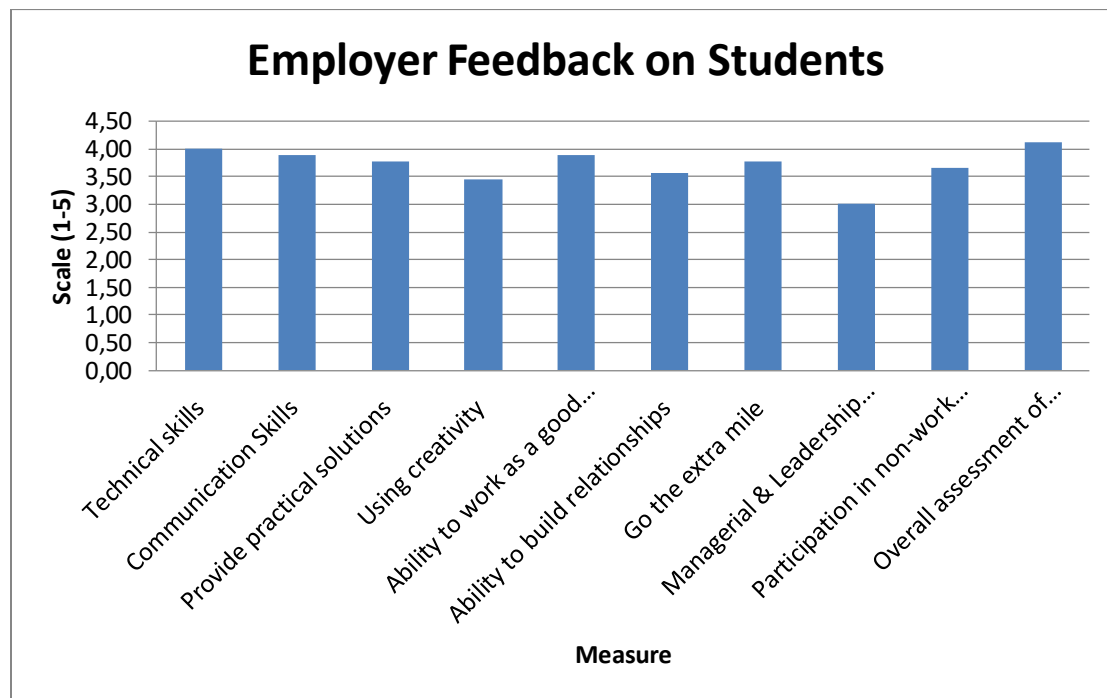

पंकज तिरवाल
 Technical N/A
 Pimpri, Chhatrapati Shivaji Maharaj
 Kaladwas, Udaipur-313003 (Rajasthan)

- c. Greater focus on field/company visits so students interact with company executives and learn from them;
- d. Added focus on lab work & practical training so students can get better understanding of concept application;

SUMMARY OF EMPLOYER FEEDBACK SURVEY & ACTION TAKEN

Employer feedback was taken to provide yet another input to improve quality of education at the institute. Responses were collated and summarized. Averaged responses are given below:

The following are observed as regards the Employer Feedback received:

1. Students of the institute scored over 4 on the following parameters:
 - a. Technical Skills
 - b. Communication Skills
 - c. Ability to Provide Practical Solutions to problems
 - d. Using creativity in workplace to solve problems
 - e. Ability to work as a good team player
 - f. Ability to build relationship in workplace
 - g. Keenness to go the extra mile to contribute to organizational goals
 - h. Participation in non-work related organizational activities
 - i. Overall assessment of Techno India NJR Students
2. The following was identified as an area of improvement
 - a. Managerial & Leadership qualities

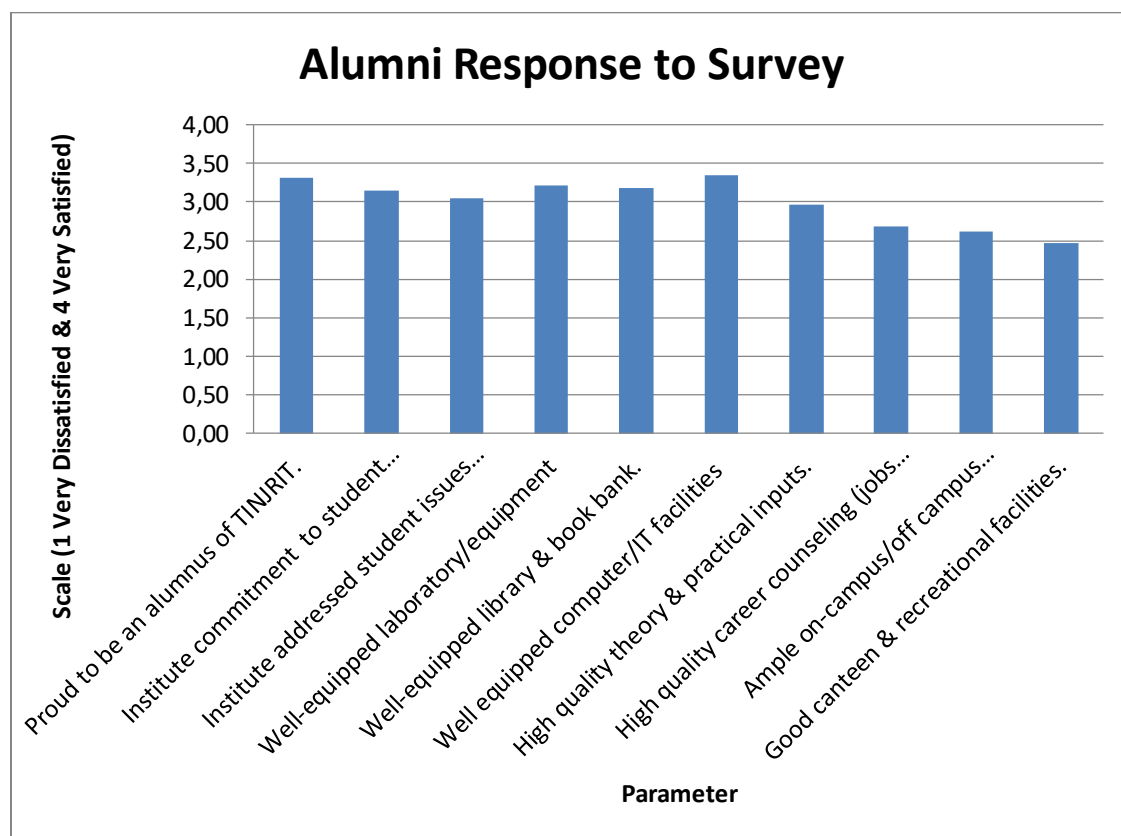

As the students joining companies are fresh graduates, it is expected that managerial & leadership qualities will develop further. Extracurricular activities has been identified as a focus area. This enhanced focus on extra-curricular activities & team events that help hone these skills so that future batches can demonstrate these better to their employers.

SUMMARY OF ALUMNI SURVEY & ACTION TAKEN

As a part of the quest for improvement, the institute contacted Alumni from all branches and sought feedback on the following parameters:

1. Feel of pride in being a Techno alumnus
2. The institute is strongly committed to student development
3. Institute & faculty addressed student issues very well
4. Institute provided well equipped laboratory & equipment
5. Institute provided a well-equipped laboratory and book bank
6. Institute provided a well-equipped computer/IT facilities
7. Students got high quality theory & practical inputs
8. Institute provided high quality career counseling (jobs & higher studies)
9. Institute provided ample jobs and off campus placement opportunities
10. Institute provided good canteen & recreational facilities

Based on the feedback the following were identified as actions:

1. Upgrading canteen facilities: 3 Canteens provided to students to cater to different tastes;
2. On campus/Off-campus Placement Drives: A fresh drive to contact more companies and create better opportunities for students will be taken up. Also more tie-ups for pool drives will be considered to enhance opportunities for students;

पंकज शिखल
Techno India NER Limited, Gurgaon
Plot-SECT, Cherasah (near) Indira Area
Kaladyas, Udaipur-313003 (Rajasthan)

3. High quality theory & practical inputs: The institute has signed multiple MOUs with reputed to provide the best theoretical and practical to students . Faculty being encouraged to upgrade their skills through various online courses and also carry out research with students to improve the quality of theory and practical inputs to students. This is in addition to various trainings announced by faculty in contemporary areas.

Progress on these actions will be reported to IQAC for further directions.

Name	Year of Passing Out	Branch	Your suggestions to the college, if any	Proposed Action for review
Aditya Sahu	2017	ME	Techno can start allotting specific mail id to each student with the college name so that all the batches can be in contact with just a mail id like in my case it could be: 13etcme004@techno.ac.in	Done
Aniruddh Singh Rao	2019	EEE	College Time Should be reduced instead of 7 hours it should be of 6 hours and training like GTT should be conducted every year and proper Holidays must be provided and students should not be out of the placement because students life get affected and they get very less opportunities for both on campus and off campus placement from college and career counselling should be done regularly.	Opportunities being provided to all students
Anshul Porwal	2019	CSE	Relevant skills should be taught which are actually being used in industry rather than going for every new buzzword which is of little to no-use in real life. More focused should be given to students going for real internships rather than conducting meaningless trainings during summer time. Students will learn more in their 3-4 month internships than in the 4 year spent at college.	Contemporary skills being provided to students through online as well as class room training

Techno India Pvt. Ltd. (C.I.T.E.)
 Plot 5/11, Chhameshwar Road, Indraprastha Area
 Kaladwas, Udaipur-313003 (Rajasthan)

			Students should be encouraged to have an actual portfolio (proof of work) instead of say, pushing them for higher marks in their term or sem exams.	
Arpit Trivedi	2020	IT		
ashish vyas	2015	ME	Please give more carrier opportunities to both On campus and off campus student	Placement results are monitored regularly and quest for better opportunities continues.
Ayush Kumar	2018	ME	Lack of focus on core Branches i.e.Mechanical and Civil. No industrial exposure and zero commitment towards skill development of students. The college focuses only on CS IT and Electronics branch and the core branches are given no valuable exposure. Certainly there's a lack of guidance from the faculty members and management of the college which strips students of the opportunities to develop as an individual and understand the demands of the industry. College needs to understand the perspective of students rather than imposing their own ideas. There's no environment for idea sharing and R&D, neither faculties are qualified enough to support and nurture ideas. I don't know if any of the suggestions will be given value due to Ego issues of the management.	Increased focus on mentoring and interaction between students so students can understand institute focus better and vice versa. Opportunities being provided to all branches.
Bhumika Rathore	208	IT	1. Better Canteen, as we need to go out. 2. More of sports	Additional canteen provided for varying tastes and facilities for extra curricular activities.
Dheeraj Madawat	2013	ECE	In today's world there are pretty much of opportunities which an engineer student could think to take on. I feel, not only TINJR, but all	13 lab set up to provide better industry perspective and preparation for jobs. Opportunities for placement/competitions being extended to students for career advancement..

			<p>students of Udaipur doesn't have that knowledge.</p> <p>It would be good idea to make them aware about all the opportunities like CDAC.Elitmus etc.</p> <p>Along with it students doesn't know which are the subjects which would extremely help them to get in good companies.</p> <p>What are the sources to learn and became expert of those subjects.</p> <p>It would be good show them all the open ways so that they could choose and put their effort in proper way to achieve best.</p>	
DIYA SHAH	2020	ECE	No	
Gaurav Jain	2019	ME	<p>Need to Focus on Development of All Branches Equally.</p> <p>Recreational Facilities should be improved and a schedule time for using that facility during college hours.</p>	Quest for providing best opportunities to all branches continues and added facilities provided for extra-curricular activities.
GOURANG UPADHYAY	2018	ME	<p>Please motivate students to get something big in life .and do provide good placement opportunities to students of core branches.</p> <p>Provide career counseling to them so they can understand what is best for them.</p> <p>Should provide strong basics of subjects and Their TECHNICAL importance just don't do formalities.</p>	Multiple MOUs signed with reputed agencies for career counseling besides focus on Mentoring. Course coverage and student learning being monitored regularly.
Harshit Solanki	2016	ME	<p>College has captured quite a pace after my passing out . However, in my opinion in today's cut throat competition every techno student should be prepared with the ongoing technology (respective branch wise) and must have couple of internships</p>	Institute focused on enhancing career guidance through reputed agencies as well as mentoring process. Focus on added training and imparting updated knowledge continues.

			with them which will not only add on to their personality, but it will also help them stand into the crowd with some useful experience. Because now it takes "kam ki degree" and not "Naam ki degree".	
Jayshree B Teli	2020	ECE	No suggestions	
Kashish Chandrayan	2016	ME		
Kavish Jain	2016	ECE		
Khushboo chandak	2018	IT	If possible include extra curricular activities also as it is required to create profiles For international admissions	Enhanced facilities for extra-curricular activities and all round development of students.
Krati Shrimali	2018	CSE		
Kunal Jain	2019	CSE	There are many listing a few below - 1. Pls improve Infrastructure 2. Improve Canteen 3. Bus facility 4. Teaching faculty 5. Accounts department 6. Ability to judge students, mentality of teachers 7. Focus on the other domains of IT industry also. Not everyone has the ability to become a developer. 8. No internships and projects for final year students. P.S. - Stop playing with Student life. Sorry If Hurt ☐	Focus on mentoring to be increased so student perspective can be better understood and students can also relate better to what college is trying to achieve. Quest to improve infrastructure to continue.
L. S. Rathore	2020	CSE	Increase arena work on skills improve ment nor to fooling parents	Focus on mentoring to be increased so student perspective can be better understood and students can also relate better to what college is trying to achieve.
lalit vijayvargiya	2015	ME

 P.O. Box 1234, Udaipur-313003 (Rajasthan)

Lokesh Dangi	2019	CSE	you try to do lot of good things for student development but most of them are not executed properly or left mid way	Improved processes (ISO 9000) and mechanism for monitoring being instituted for closer understanding of student needs.
Madhur Sachdev	2017	ME	<p>1) Teach students to find a Job (Highly Recommended), 90% of my batch mates are unemployed or are working on very low salaries. There are ample opportunities, but students of TINJRIT don't know how to find a job.</p> <p>2) RTU books are outdated and are not at all sufficient to find a job. Train them on skills, no one asks for marks, everyone wants a skilled resource.</p> <p>3) Let students explore, make them aware of their competition, start student exchange programs, aware them about the latest trends of the industry. Don't make students learn definitions and full forms, make them know the technology and its use case.</p> <p>4) Figure out students who are not doing good in technical things, help them explore non-technical options. Make them aware of fields like Operations, Management, Sales, Marketing, etc. Make leaders, not employees.</p> <p>5) There is a world behind Infosys, TCS, IBM and Wipro.</p> <p>6) http://technonjr.org/ website is not secure. It needs an SSL certificate.</p>	To be discussed

			It's free. and yes a good website as well.	
Madhvi Mathur	2019	IT	Improvement needed in Labs for practicals, college canteen , number of buses.	Infrastructure (labs and equipment) being constantly upgraded for practical experience. No. of Canteens increased while comfort of seating in buses monitored regularly.
Manali Kapoor	2013	ECE	-	
Minal jaroli	2018	CSE	Please include sports in the college activities.	Emphasis on extra-curricular activities being increased through added facilities.
Mukesh Kumar	2017	ME	No , it's all good	
Parth Sharma	2020	CSE	Relying less on attendance	
Pranshi	2020	ECE		
Praveen lohar	2019	EEE	Don't fill empty teachers seat with any one select those who are passionate about teaching don't show that your best college just be a good college	Teacher selection takes into account multiple factors like qualification, interest in research, ability to run classes etc. Focus on improving quality of faculty to continue.
RAHUL JAIN	2015	ECE		
Reenal Jain	2014	CSE	NA	
Ritwik Joshi	2019	CSE	Please make a strong alumni community	Alumni Association created.
Ronak Mandawat	2019	ME	Please give equal opportunities of placement to students of mechanical engineering branch as given to computer science and information technology branches	
sagar Paliwal	2019	ME	Destroy the college or stop me and civil branches	To be discussed.
Saina Dawood	2014	CSE	Great college for people deciding to stay in udaipur for graduation	
Sanjay Rajpurohit	2018	CSE	NA	
sanju kumar	2013	ECE		
Saurabh Parmar	2019	Civil	College should be more focused on studies then the small issues like	Mentoring to focus on helping students understand the need for attendance for knowledge transfer. Quest for placement

			attendance. College should have to focus on placements for the civil and mechanical branches also.	opportunities for all branches to continue.
Shaivee	2020	IT	Kindly give students some lease for attendance. Start some Entrepreneurship classes, workshops, webinars, parent's meet. It will help the students.	Enhanced focus on entrepreneurship, webinars and workshops.
Shaivee Kumawat	2020	IT	Thankyou to everyone	
shankar	2018	ME	please give students some freedom.	Mentoring to focus on improved communication between students and institute.
Shreya Bhanot	2020	CSE		
Shubham Gandhi	2015	ME	Keep Doing the Good Work, proud to be an alumni, suggest to have some alumni sessions for the coming batches to make them ready for the corporate world.	Alumni Association set up. Level of interaction to increase.
Soumya Sanadhya	2018	ECE		
Toshal pandya	2018	ECE	Please shut it down or else stop politics favoritism thoroughly and let everybody know in the staff that what you are actually doing and what you are supposed to do I could write a lot but choosing techno was the worst mistake of my life	To be discussed
Varun Bhatnagar	2018	ECE	Highly required for all branches students to "Improvise deep Theoretical knowledge and concepts understanding along with practical knowledge, acquiring only practical knowledge lacks engineers to work deeper in their domains.	Add on courses & trainings focusing on improving theoretical inputs and practical understanding of subjects.
Vidushi kothari	2020	ECE		
Vora Viraj KiranKumar	2019	ME	It gives more attention to IT branch	Quest continues for all branches,.

Yash Audichya	2015	EEE	Kindly increase the strength in each discipline.	
Yash Kothari	2018	CSE	Industrial experience can be the only factor of small private colleges like ours that can lead student to huge pay-scale jobs. Students should be consulted before adding to any training program, not forced that we were. To compete with huge college and experienced students, juniors like us should be promoted into creating or inventing some good stuff and learning more practical knowledge than just business analyst or Deep learning trainings which cannot give good jobs at the start.	Multiple training programmes aimed at imparting practical knowledge to students being run to provide expertise in contemporary areas of knowledge.
