ENVIRONMENTAL ENGINEERING : This book is mainly meant for students of First Year Engineering IInd Semester for all branches. However, the contents of the book are also suitable for higher classes of engineering and non engineering courses such as B.Sc.(Environmental Science), M.Sc.(Environmental Science), M.Tech(Environmental) etc. Besides the undergraduate students of all disciplines the book will also be useful for those appearing in various competitive exams since environmental issues now find a focus in most of such examinations. The Contents of the book will of interest to all educationists, planners and policy makers. Key features of the book include a simple and holistic approach with illustrations, tables and specific case studies mainly in the Indian context. The basic terminologies have been defined in the text while introducing the topics and some useful terms mentioned in the text have been explained in the glossary for an easy grasp.
