How EduTech is deployed at your campus?

1. Our Team of engineers will visit the campus and check the availability of resources like networking and hardware. Our engineer will also give a detailed understanding to your hardware and networking engineer so that he can carry on with your future operations related to EduTech. The installation and training session will not begin till our engineer certifies the availability of resources at your campus.
2. 1 Day will be needed for full installation and deployment of EduTech at your campus. An ERP Manager should be appointed by the institute by this time so that he knows each and every process of the implementation of the ERP. At the time of installation proper training of installation and coordination with the support team of EduTech will be provided to the ERP Manager.
3. 3 Full Days will be dedicatedly provided to the institute by our Training Team. The complete schedule of the training will be discussed and finalized with the institute in advance and client has to submit a training confirmation sheet in advance. Due to unavailability of any staff member or any other reason if Institute needs additional training then it will be additionally charged.
4. After the completion of installation and training, the Institute's staff will be able to start the day to day processes and data entry in the ERP. If they still need any help or support, IFW's Team will be available online, on Email & on Phone.
5. Although IFW EduTech is a Global Product and getting updated time to time to fulfill educator's need and requirements. In case of any client need customization in process and working of the system, then client have to pay additionally on the basis of nature of customization for customization client have to provide details within a month of installation and training. After evaluating the customization needs of client, IFW authority will commit a time line and cost to deliver the customization need of client.
